

2022 PEPPERS

Offered by
North Country
Master Gardener Volunteers Association

EARLY JALAPENO Heirloom. A very hot pepper with excellent keeping qualities, although Jalapenos are generally used green, they do turn red at full maturity. You should get a very abundant yield of 1 inch by 3 inch, thick walled fruits, perhaps thirty per plant.

GIANT MARCONI 2001 AAS Winner. Large, tapered, elongated fruits grow up to 8" long and 3" across at the upper end. Sweet, yet smoky flavor is equally delectable when fruits are eaten green or red, fresh or grilled. Produces larger than normal crops anywhere. Hybrid.

KING OF THE NORTH Sweet, blocky, uniform fruits excellent for stuffing or fresh eating. For northern gardeners where seasons are cool and short. Plant height 24" - 36", fruit size 4"-6" long

NEW ACE Huge yields of medium sized 3-4 lobed fruits. Has apparent tolerance to blossom drop as nearly every flower produces a pepper. Widely adapted but performs particularly well in cool climates where bell peppers are difficult to grow successfully. F1 Hybrid

RUBY KING Heirloom bell pepper with early ripening fruits. Dating to at least 1902, Ruby King bears heavy crops of blocky, sweet and mild fruits which ripen from green to red. Open pollinated.

WISCONSIN LAKES Plant produces good yields of 1 1/2" long by 2 1/2" wide sweet peppers. Peppers turn from green to a red when mature. This thick-walled bell pepper is very delicious and sweet.
