## MAY 13, 2021 6:30PM

## Mike Heim 6:36 Unusual Hardy Plants For Open Sites

Mike Heim has created an incredible plant ark deep in the Northwoods of Wisconsin. Bamboo, cacti, rhododendrons, magnolias, and exotic fems are some of the plants which greet visitors. Mike also teaches natural sciences at the Lac Courte Oreilles Ojibwe College and guides public field trips through their Extension Program. Mike would like to see people push the limits of what is commonly thought possible to grow in an area. He himself has a serious case of zone denial.
